ISU Monarch Data Summary for NCIG

Jarad Niemi, Seth Appelgate, and Nehemias Ulloa 2019-04-23

Table 1 provides total number of monarchs sighted anywhere around site during entire time at site, number of monarchs sighted during a survey period, number of milkweed ramets (an upper limit of 20 per round per site, although the same milkweed may have been surveyed in different rounds), number of monarch eggs counted on milkweed plants (if no milkweed present, no monarch eggs present, number of monarch larvae (caterpillars) counted on milkweed plants (if no milkweed present, no larvae present).

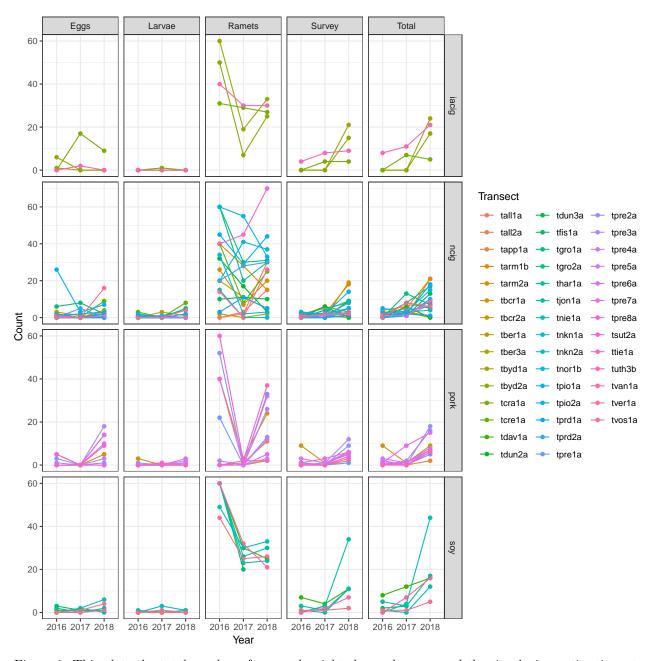

Figure 1: This plots the total number of monarchs sighted anywhere around the site during entire time at site. The colors correspond to the different trasects.

Table 1: Monarch adults (total and during survey), milkweed ramets, monarch eggs on milkweed, and monarch larvae on milkweed. Note ramets, eggs, and larvae were collected differently for 2016.
